School of Computing Science and Engineering

LAB - 1&2 Exercises

Course Code	:	CSE2004 - Data Base Management Lab	Date	:	27/07/2018
Lab Experiment	:	Data Definition Language Commands	Slots	:	L29+L30
Instructors	:	Prof. Ramesh Ragala			

1. You have just started a new company. It is time to hire some employees. You will need to create a table that will contain the following information about your new employees: (integer:emp_no, string:e_name, string:e_address, integer:e_contactno, string:e_mailID, integer:Dept_no, string:Jod_id, number:Salary)

2. Add a new column; Joining Date to existing relation; date:e_joinDate

3. Change the data type of Dept_No from integer to varchar(2)

4. CREATE TABLE statement for the customers table with the following schema: (integer: Customer_id, char(50):customer_name,   char(50):address, char(50):city, char(25):state, char(10):zip_code)
